INPS PAHOVE CHAPTER
NATIVE PLANT SALE

Celebrating
the **WEB OF LIFE!**

SATURDAY
APRIL 23
10 AM - 1 PM

AT THE MK NATURE CENTER 600 S. WALNUT, BOISE
behind the Fish & Game Building

“Habitat” for sale!

Native plants are a vital part of a healthy habitat and the natural web of life. Removing a certain native plant from the landscape will likely remove the insect that feeds on that plant, which in turn may eradicate the bird that feeds on that insect.

As open space disappears, you can look to your own landscape as a refuge for biodiversity.

Native organisms including plants, mammals, birds, amphibians, and insects create an intricate web of life, with each species' life cycle highly dependent on the others.

When you purchase and plant natives from this sale you help strengthen that web, support INPS, the MK Nature Center & benefit our native pollinators, birds and wildlife.

A 2016 plant availability list will be posted by mid-April at www.idahonativeplants.org
