

KEY to `Rare and Sensitive Species Table, by County`:

County

Idaho counties (Ada, Adams, Bannock, Bear Lake, Benewah, Bingham, Blaine, Boise, Bonner, Bonneville, Boundary, Butte, Camas, Canyon, Caribou, Cassia, Clark, Clearwater, Custer, Elmore, Franklin, Fremont, Gem, Gooding, Idaho, Jefferson, Jerome, Kootenai, Latah, Lemhi, Lewis, Lincoln, Madison, Minidoka, Nez Perce, Oneida, Owyhee, Payette, Power, Shoshone, Teton, Twin Falls, Valley, Washington)

Scientific Name

Scientific name uses formal Latin name in binomial/trinomial nomenclature. Species or Intraspecific species name include: genus, specific epithet, and variety, if applicable.

Common Name

Common name uses an accepted, local common name.

Global Conservation Rank (NatureServe)

G	Global rank indicator; denotes rank based on range wide status.
T	Trinomial rank indicator; denotes range wide status of variety or subspecies.
GX	Believed to be extinct throughout its range.
G1	Critically imperiled: at very high risk of extinction due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.
G2	Imperiled: at high risk of extinction or elimination due to very restricted range, very few populations, steep declines, or other factors.
G3	Vulnerable: at moderate risk of extinction or elimination due to a restricted range, relatively few populations, recent and widespread declines, or other factors.
G4	Apparently Secure: uncommon, but not rare; some cause for long-term concern due to declines or other factors.
G5	Secure: Common, widespread, and abundant

State Conservation Rank (Idaho Natural Heritage Program)

S	State rank indicator; denotes rank based on state wide status.
SX	Believed to be extinct throughout its range with in State.
S1	Critically imperiled: at very high risk of extinction due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.
S2	Imperiled: at high risk of extinction or elimination due to very restricted range, very few populations, steep declines, or other factors.
S3	Vulnerable: at moderate risk of extinction or elimination due to a restricted range, relatively few populations, recent and widespread declines, or other factors.
S4	Apparently Secure: uncommon, but not rare; some cause for long-term concern due to declines or other factors.
S5	Secure: Common, widespread, and abundant

Variant Conservation Status Rank (NatureServe & Natural Heritage)

G#G# S#S#	Range Rank – a numeric range rank used to indicate a range of uncertainty about the status of the species.
GU or SU	Unrankable – currently unrankable due to lack of information
GNR or SNR	Not Ranked – rank level not yet assessed

Rank Qualifiers (NatureServe & Natural Heritage)

?	Inexact Numeric Rank
i	Introduced
r	Reintroduced/restored

Breeding Status Qualifier

B	Breeding
N	Non-breeding
M	Migratory

Federally Listed

US Fish and Wildlife Service listed species, per Endangered Species Act

SWAP

State Wildlife Action Plan

SCGN

Species of Greatest Conservation Need

CWCS

Comprehensive Wildlife Conservation Strategy (see: <http://fishandgame.idaho.gov/public/wildlife/cwcs/>)

USFSreg1 (US Forest Service - Northern Region)

Listing status based on federal status under the Endangered Species Act: Endangered, Threatened, Proposed, and Candidate

USFSreg4 (US Forest Service - Intermountain Region)

Listing status based on federal status under the Endangered Species Act: Endangered, Threatened, Proposed, and Candidate

BLM (Bureau of Land Management) Status

Type 1	Threatened, Endangered, Proposed, and Candidate species.
Type 2	Rangewide/globally imperiled species-high endangerment.
Type 3	Rangewide/globally imperiled species-moderate endangerment (plants) or Regional/state imperiled species (animals).
Type 4	Species of Concern (plants) or Peripheral Species (animals).
Type 5	Watch list (plants and animals).

IDAPA State Protection Status

Idaho Administrative Procedures Act: Designation 13 Title 01 Chapter 06 (IDAPA 13.01.06) -Rules Governing Classification and Protection of Wildlife

INPS (Idaho Native Plant Society) State Rare Species Definitions

Possibly Extirpated	Taxa known in Idaho only from historical (pre-1920) records or otherwise believed to be extirpated from the state.
State Priority 1	Taxa in danger of becoming extinct or extirpated from Idaho in the foreseeable future if identifiable factors contributing to their decline continue to operate. These are taxa whose populations are present only at critically low levels or whose habitats have been degraded or depleted to a significant degree.
State Priority 2	Taxa likely to be classified as Priority 1 within the foreseeable future in Idaho, if factors contributing to their population decline or habitat degradation or loss continue.
Sensitive	Taxa with small populations or localized distributions within Idaho that presently do not meet the criteria for classification as Priority 1 or 2, but whose populations and habitats may be jeopardized without active management or removal of threats.
Monitor	Taxa common within a limited range in Idaho, as well as those which are uncommon, but have no identifiable threats (e.g., certain alpine taxa).

INPS (Idaho Native Plant Society) Threat Priority:

Priority	Taxonomy	Threat Magnitude	Threat Immediacy
1	Monotypic genus	High	Imminent
2	Species	High	Imminent
3	Subspecies/Variety	High	Imminent
4	Monotypic genus	High	Non-imminent
5	Species	High	Non-imminent
6	Subspecies/Variety	High	Non-imminent
7	Monotypic genus	Low	Imminent
8	Species	Low	Imminent
9	Subspecies/Variety	Low	Imminent
10	Monotypic genus	Low	Non-imminent
11	Species	Low	Non-imminent
12	Subspecies/Variety	Low	Non-imminent
